

ES2258LB5

ES2258LB7

- Crimping tool for off-load transformer tap changers

- Designed for standardized 30 A and 63 A tap changers
- 30% lower hand-force than the previous T2258 tool
- Ergonomic handles make installation easier
- Scissor movement allows for optimal access into narrow spaces
- Ratchet latch, which does not release until crimping is completed
- Hexagonal crimp geometry
- The possibility of calibration after prolonged usage

ES2258LB5

A crimping tool for solid copper wires of diameters 2.5-2.8 mm in combination with 5 mm transformer tap changer connectors.

ES2258LB7

A crimping tool for solid copper wires of diameter 4.0 mm in combination with 7 mm transformer tap changer connectors.
